POTOMAC PATENT GROUP PLLC P. O. BOX 270 FREDERICKSBURG, VA 22404			EXAMINER BILGRAMI, ASGHAR H	
			ART UNIT 2143	PAPER NUMBER
			NOTIFICATION DATE 09/25/2008	DELIVERY MODE ELECTRONIC

**Please find below and/or attached an Office communication concerning this application or proceeding.**

The time period for reply, if any, is set in the attached communication.

Notice of the Office communication was sent electronically on above-indicated "Notification Date" to the following e-mail address(es):

tammy@ppglaw.com

### Office Action Summary

**Application No.**

10/074,019

**Applicant(s)**

CAMERON, KEN

**Examiner**

ASGHAR BILGRAMI

**Art Unit**

2143

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 17 July 2008.  
2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.  
3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**Disposition of Claims**

- 4) ☒ Claim(s) 1-9 & 11-18 is/are pending in the application.  
4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.  
5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.  
6) ☒ Claim(s) 1-9 & 11-18 is/are rejected.  
7) ☐ Claim(s) \_\_\_\_\_ is/are objected to.  
8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

**Application Papers**

- 9) ☐ The specification is objected to by the Examiner.  
10) ☒ The drawing(s) filed on 14 February 2002 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).  
11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

**Priority under 35 U.S.C. § 119**

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).  
a) ☐ All b) ☐ Some \* c) ☐ None of:  
1. ☐ Certified copies of the priority documents have been received.  
2. ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.  
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

\* See the attached detailed Office action for a list of the certified copies not received.

**Attachment(s)**

- 1) ☐ Notice of References Cited (PTO-892)  
2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)  
3) ☐ Information Disclosure Statement(s) (PTO/SI/08)  
Paper No(s)/Mail Date \_\_\_\_\_  
4) ☐ Interview Summary (PTO-413)  
Paper No(s)/Mail Date \_\_\_\_\_  
5) ☐ Notice of Informal Patent Application  
6) ☐ Other: \_\_\_\_\_

## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 7/17/2008 has been entered.

### ***Claim Rejections - 35 USC § 103***

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1- 9 & 11-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Chang et al (U.S. 6,338,078).

4. As per claims 1, 5 & 8 Chang disclosed a processing system comprising a plurality of processing engines for processing datagrams in a predetermined order, each processing engine comprising at least one input port, at least one output port and a plurality of processing elements, each processing element comprising an input port connected to the at least one input port of the processing engine, an output port connected to the at least one output port of the processing engine (col.5, lines 8-25) and

arithmetic and logic means, and a ticket dispenser adapted to associate a ticket with each incoming datagram (col.5, lines 66-67 & col.6, lines 1-32) wherein the processing elements, upon becoming available, take a next ticket from the ticket dispenser (col.6, lines 33-50, 66-67 & col.7, lines 1-5), and the order of processing datagrams being controlled at the at least one input port of the processing engine and at the least one output port of the processing engine in dependence on ticket associated with the datagram or a group of the datagrams and the reading and writing of the read and processed datagram takes place upon the process being given permission to continue (col.5, lines 66-67, col.6, lines 1-50). Although Chang did not explicitly disclose a ticket dispenser adapted to associate a ticket with each incoming datagram. However Chang disclosed a queuing mechanism for queuing the packets (datagrams) in a such a way that packets arrive at the device driver in a certain sequence and are then aligned in sequence to be processed by multiple processors (Figure.3, col.5, lines 8-26, lines 66-67, col.6, lines 1-32).

It would have been obvious to one in the ordinary skill in the art at the time the invention was made to have incorporated the use of queuing mechanism instead of ticket dispenser to align packets in a certain sequence before being processed by multiple processors in order to make the processing of the packets more efficient resulting in a more robust packet processing system.

5. As per claim 2 Chang disclosed a method according to claim 1, wherein the order of the datagrams or group of datagrams at the at least one input port corresponds to the

order of the datagrams at the at least one output port (col.5, lines 66-67, col.6, lines 1-50).

6. As per claim 3 Chang disclosed a method according to claim 1, wherein the tickets comprise numerical values (col.5, lines 66-67, col.6, lines 1-50).

7. As per claim 4 Chang disclosed a method according to claim 1, wherein the ticket comprises a semaphore with data associated therewith (col.5, lines 66-67, col.6, lines 1-50).

8. As per claim 6 Chang disclosed a processing engine according to claim 5, wherein the processing element comprises an element of a multi threaded array processing engine (col.5, lines 1-26)

9. As per claim 7 Chang disclosed a processing engine according to claim 5, wherein the processing element can leave or enter the predetermined order (col.5, lines 66-67 & col.6, lines 1-32).

10. As per claim 10 Chang disclosed a processing system according to claim 8 further comprising a ticket dispense for giving tickets to a datagram or group of datagrams (col.5, lines 66-67 & col.6, lines 1-50).

11. As per claim 11 Chang disclosed a processing system according to claim 10, wherein the tickets are issued on a first come first served basis ((col.5, lines 1-26, lines 66-67 & col.6, lines 1-50).

12. As per claim 12 Chang disclosed a processing system according to claim 8 further comprising a counter for maintaining the value of the current ticket (col.5, lines 66-67 & col.6, lines 1-50).

13. As per claim 13 Chang disclosed a processing system according to claim 12, wherein the counter comprises storage means for storing a numerical value (col.5, lines 66-67 & col.6, lines 1-50).

14. As per claim 14 Chang disclosed a processing system according to claim 13, wherein once a processing element is allocated a datagram or group of datagrams for processing, the counter is incremented (col.5, lines 66-67 & col.6, lines 1-50).

15. As per claim 15 Chang disclosed the method of claim 1, wherein a number of tickets is greater than a total number of processors (col.5, lines 14-17).

16. As per claim 16 Chang disclosed the method of claim 1, wherein the ticket represents an arrival time of the packet (col.6, lines 4-50).

17. As per claim 17 Chang disclosed the method of claim 1, wherein the processor drops selected datagrams from being written to the output buffer (col.6, lines 4-50).

18. As per claim 18 Chang disclosed the method of claim 1, wherein the processor enters or leaves a processing sequence (col.5, lines 29-39).

### ***Response to Arguments***

19. Applicant's arguments filed 7/17/2008 have been fully considered but they are not persuasive.

20. Amendment made to the claim fail to narrow the scope of the claims. For example, the limitation "and the reading and writing of the read and processed datagram takes place upon the process being given permission to continue" is basically describing that having a ticket gives that datagram a permission to be processed. As described in applicants specification on page 9 lines 7-9 which states:

be greater than or equal to sixteen. Having a ticket gives the holder permission to continue but is not a handle to a particular buffer itself.

21. Applicant on page 8 of remarks with respect to amended claim 1 argued that Chang describes having a dedicated queue (62-68) corresponding to each processor

(54-60) such that a processor (such as processor 60 for example) can only processes data in queue 68 and not data in other queues (such as 62, 64, or 67) even if processor has completed processing data of the data in its queue (i.e. 68).

As to applicant's argument that language of claim 1 is broad enough that Chang anticipates it. For example the claim language discloses "at least one processing engine having at least one input port and at least one output port" hence even if applicant's assumption of Chang's disclosure above was considered even then it clearly anticipates applicant's invention described in the broad language of claim 1.

22. Applicant on page 9 of remarks merely described change disclosure and made general allegation that Chang does not disclose claim1.

Applicant is advised to formulate arguments in such manner that clearly elaborate how prior art is different with respect to the specific limitations that are described in the claims.

23. Applicant is again advised to incorporate the unique details regarding the functionalities & techniques described in the specification of this invention that come into play in controlling the order of datagrams into the independent claims. The current claim language is still broad and incorporating unique details into the claim language will be beneficial in overcoming the art.

***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to ASGHAR BILGRAMI whose telephone number is (571)272-3907. The examiner can normally be reached on 9-5.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Tonia L.M. Dollinger can be reached on 571-272-4170. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
